CARMA - Web

Vancouver 2008

Why?

- Some background (current site)
- Need for a public site to communicate status of herds, threats, ...(one of the public faces of CARMA)
- Need for internal communication and collaboration
- Research (what other projects are happening)

The Vision

- Use of collaborative tool
- Both internal and external sites within a single site
- Ability for update by CARMA network with low ongoing support requirements
- Ability to store data and/or supplemental meta/data

Current Status

- Design phase complete
- Menu hierarchy
- Content
  - Currently tweaking menu structure and working to get all menus functioning smoothly
  - Initial set of content
  - Maps

Demonstration

- A typical herd
- A typical project
- Attachments/images/
- Search capabilities

WHAT'S NEW?
NEW TO THE WEB
CARMA's new web site is now live. Content will be added over the next 2 months. Check back regularly for updates.
FEATURED HERD OF THE MONTH
Porcupine Herd
The Porcupine Herd reached a peak in 1989 (178,000) and, has been declining until the 2001 census (123,000) at a rate of 3.5% per year based on censuses in 1992, 1994, 1998 and 2001. Of all herds in North America which increased in the latter quarter of the 20th Century, the Porcupine Herd had the lowest rate of increase and is thus the least productive of the large migratory herds.

What will search do?

- Search web pages
- Search attachments (pdf’s, excel files, word documents)
- Appropriate to user ids (e.g. steering committee docs if you are signed in)
- Available to public

How to contribute?

- What we are asking from "herd co-ordinators" i.e. keep project up to date, include new reports, keep your contacts current
- What we are asking from "project leaders"
- Steering committee

Security

- Flexible security based on pages (or group of pages e.g. all steer com pages)
- View and Update permissions
- Can be used to secure data

Member Login

- What it does?
- When you need to use it?

Challenges

- Keeping the site current
- Engaging CARMA network in use of the site
- Communicating the status of the site (ideas: e-mails)
- Publicizing the site
- Have information that is usable by the public as well as by CARMA network

Next Steps

- Finalization of menus
- Content/content/content (and a plan to get it there)
- Need for web-coordinator
- Public announcement

Practical Matters

- Accounts (request account through Don)
- URLs
- Documentation
  - Getting started manual
  - Full Confluence Documentation

Online Documentation
